PROFESSIONAL SUMMARY

Software Engineering undergraduate with hands-on experience in full-stack web development using React.js, Node.js, Express.js, MongoDB, Spring Boot, and ASP.NET Core. Skilled in developing RESTful APIs, responsive user interfaces, CRUD-based systems, authentication, database integration, and role-based access control through academic and personal projects. Familiar with Git, GitHub, Agile practices, Docker, Kubernetes, and API testing tools. A motivated and adaptable learner with strong problem-solving skills, seeking a Software Engineering Internship to contribute to real-world software development while improving technical and professional skills.

EDUCATION

Sri Lanka Institute of Information Technology (2023 - 2027)

Bachelor of Science Honours in Information Technology Specialized in Software Engineering

Current GPA: 3.46 / 4.00

TECHNICAL SKILLS

- **Programming Languages:** Java, JavaScript, PHP, C, C++, C#, Kotlin
- **Frontend Technologies:** React.js, HTML, CSS, Tailwind CSS, React Bootstrap, TypeScript
- **Backend Technologies:** Node.js, Express.js, Spring Boot, ASP.NET Core, JSP/Servlet, RESTful API Development
- **Databases:** MySQL, MongoDB, SQLite
- **Frameworks & Libraries:** Spring MVC, Mongoose, Entity Framework Core, JPA/Hibernate, Maven
- **Web & API Technologies:** RESTful APIs, MVC Architecture, JSON, HTTP Methods, JWT Authentication, Role-Based Access Control
- **DevOps & Deployment:** Docker, Kubernetes, Git, GitHub
- **Tools:** VS Code, Eclipse, IntelliJ IDEA, MySQL Workbench, Apache Tomcat, Postman, Android Studio, Figma
- **Methods & Practices:** Agile/Scrum Basics, CRUD Operations, Dependency Injection, Exception Handling, Debugging, API Testing, Responsive Web Design

PROJECTS

PeriodPal - Menstrual Health & Resource Management System, Full-Stack - 2026

- *Technologies- React.js, Tailwind CSS, Axios, Node.js, Express.js, MongoDB, Mongoose, JWT Authentication, OpenStreetMap API, Nodemailer, Git, GitHub*
- Developed a full-stack web application for menstrual health management and NGO product distribution with complete CRUD and real-time inventory tracking.
- Integrated OpenStreetMap API for location-based logistics and built role-based access modules for users and NGOs. Designed a modern, responsive UI using React and Tailwind CSS.

Library Management System, Full-Stack - 2026

- *Technologies - C#, ASP.NET Core Web API, Entity Framework Core, SQLite, React, TypeScript, JWT Authentication, REST API, Git, GitHub*
- Built a full-stack library system with secure .NET backend and React + TypeScript frontend, complete CRUD operations, and JWT authentication with password hashing.
- Applied input validation, global error handling middleware, structured API layering, and protected routes.

SmartMediCare - Microservices Healthcare Platform, Full-Stack - 2026

- *Technologies - React.js, Node.js, Express.js, MongoDB, Mongoose, JWT Authentication, Docker, Kubernetes, Jitsi API, Stripe (Sandbox), REST APIs, Git, GitHub*
- Built a full-stack microservices healthcare platform enabling patients to search doctors, book appointments, make payments, and attend real-time video consultations.
- Implemented Appointment Service and Telemedicine Service with complete lifecycle management and Jitsi Meet API video sessions.
- Designed database-per-service architecture with JWT-based authentication and role-based access control for Patient, Doctor, and Admin roles.
- Containerized services with Docker and configured Kubernetes deployments for scalable cloud deployment.

TradeLink - Service Request Board, Full-Stack -2026

- *Technologies - Next.js, React.js, Node.js, Express.js, MongoDB, JWT, Tailwind CSS, Jest*
- Developed a full-stack service request management platform with JWT-based authentication, protected routes, and RESTful APIs using Next.js, Express.js, and MongoDB.
- Implemented advanced features including keyword search, job status tracking, and API testing with Jest and Supertest.

FinTrack - Personal Finance & Budget Tracking Application, Full-Stack - 2026

- *Technologies- React.js, Node.js, Express.js, MongoDB, Mongoose, JWT Authentication, Google Sign-In, Recharts, REST APIs, Git, GitHub*
- Developed a full-stack finance tracker for managing income, expenses, categories, and monthly budgets with Google Sign-In and JWT authentication. Built an interactive dashboard with expense distribution charts, budget vs. actual spending analysis, and transaction insights.

AURASYNC - Online Employee Management System, Full-Stack - 2024

- *Technologies- Java (JSP/Servlet), HTML, CSS, JavaScript, MySQL, MySQL Workbench, Apache Tomcat*
- Built a full-featured employee management system with MVC architecture, role-based access for Admin, HR Manager, and Employees, and responsive dashboards.

EDUCORE - Learning Management System, Full-Stack - 2025

- *Technologies- React.js, Node.js, Express.js, MongoDB, Mongoose, JavaScript, HTML, CSS*
- Engineered a role-based LMS for admins, teachers, and students to manage classes, enrollment, and feedback with automated reporting and responsive UI.

Appointment Booking System, Full-Stack - 2025

- *Technologies - React.js, React Bootstrap, Axios, Node.js, Express.js, MongoDB, Mongoose, JWT Authentication, Multer (Image Upload), Git, GitHub*
- Developed a salon booking platform with real-time slot availability, automated email confirmations, and an admin dashboard for schedule management.

Student Shop E-Commerce Website, Full-Stack - 2026

- *Technologies - React.js, React Bootstrap, Axios, Node.js, Express.js, MongoDB, Mongoose, JWT Authentication, Multer (Image Upload), Git, GitHub*
- Developed a full-stack e-commerce platform for students with secure authentication, product browsing, and order management. Implemented a comprehensive admin dashboard with real-time inventory updates, image uploads, and order status tracking.

Lottery Results Reader (Spring Boot), Backend - 2026

- *Technologies- Java, Spring Boot, Spring MVC, REST API, Jsoup (Web Scraping), MySQL, Spring Data JPA / Hibernate, Maven, Postman*
- Built a Spring Boot backend that auto-fetches lottery results using Jsoup web scraping, persists data in MySQL, and exposes REST endpoints for querying results.

WHATSAPP AUTOMATOR - Message Sender & Receiver, Automation - 2026

- *Technologies -Java, Selenium WebDriver, ChromeDriver, XPath/CSS Selectors, WebDriverWait (Explicit Waits)*
- Built a Java-based automation tool using Selenium WebDriver to send messages and detect unread chats on WhatsApp Web with explicit waits for dynamic elements.

VOTESPHERE - Online Voting System, Full-Stack- 2024

- *Technologies - PHP, HTML, CSS, MySQL, XAMPP/Apache*
- Built a secure online voting system with authentication, vote validation, and duplicate-prevention logic using PHP and MySQL.

Mood Tracking Mobile App, Mobile - 2025

- *Technologies - Kotlin, Android Studio, SharedPreferences, MPAndroidChart, Alarm Manager*
- Designed a wellness app for mood journaling with visual charts, daily habit tracking, hydration alerts, light/dark mode, and local data storage.

MoodAura - Mood Based Task Management App - 2025

- *Technologies-Kotlin, Android Studio*
- Built an Android task management app that adapts suggestions based on the user's emotional state with mood journaling, task creation, and mood-pattern tracking.

Travel App UI/UX Design, Design - 2025

- *Technologies- Figma*
- Established a modern, user-friendly travel application interface with features for trip discovery, booking, and itinerary planning.
- Created clean, accessible layouts with strong visual hierarchy, smooth user flows, and intuitive navigation across all mobile screens.
- Focused on color harmony, responsiveness, and usability to deliver an engaging and seamless travel experience.
